

Certificate of Conformity

Product Name : FILTER SLEEVE – 026

Dimension : FW 328 MM X LENGTH 520 MM
SS316L RING 4 MM X 209 MM

Quantity : 20 Pcs

Customer PO NO : 2024-25/98

Sefar's OM No. : 00850/18

Invoice No : 059

Identification No : SI/1486/1218

Inspection : SANJEET

Date : 16-Nov-24

Sefar Material Type : SEFAR TEXEX MULTI 07-65-180 WA PHARMA

Lot No : 16462192

Item No : V-117-0156-B1

Material : PET

**We hereby confirm that the order sated above
complies with the Sefar guidelines.**

Customer : ARK SCIENTIFIC

Remarks : Do not expose to direct sunlight / ultra violet (UV) light.

Test Report
Electrical Resistance of Assembled Article

Date : 16-NOV-24
Customer : ARK SCIENTIFIC
Customer's Order number : 2024-25/98
SEFAR order number : 059

SEFAR confirms, that the following article has been tested according to the appropriate SEFAR guideline and complies with the target of an electrical resistance $<10^5$ Ohm. The measured values are documented internally.

Article number : V-117-0156-B1
Article description : FILTER SLEEVE MADE OF SEFAR TETEX MULTI 07-200-150 WA PHARMA WITH STICHED SEAM.TOP OPEN WITH 14MM ELASTIC & BOTTOM CLOSED WITH DISC SIZE:-DIA 40MM X LENGTH 209MM ARTICLE:-A-161-026-005

The tested resistance relates to a brand new assembled article.

Defective, heavily used up, repaired or not appropriately applied articles could affect the electrical resistance of the filter system.

Sefar provides industry leading, customized products mainly based on monofilament mesh and fabrics, expert services and professional customer support around the world for more than 180 years. Our products are used in a broad spectrum of filtration, separation and dosing applications.

The specification of our products is designed to meet and exceed the challenging expectations of our customers. Because of technological developments related to the product and the constant optimization of our manufacturing process the specification are subject to change without notice. Please consult your local Sefar representative to verify that this information remains valid and check the suitability of this product for the targeted application before use.

Please note: This is an automatically generated document. All stated values with indications of tolerances are measured based on a product specific control plan and represent statistical mean values.
